

Vitaderm 4000 VitaLift Advanced Microcurrent System

The Ultimate Microcurrent Systems Vitaderm® 4000 (face and body)

The Vitaderm® 4000 and VitaLift™ systems are the result of intense scientific research and extensive consultations with aesthetics professionals and physiotherapists who are experts in their field.

Their microcurrent circuitry, controlled by advanced and unique technology, delivers impressive results from facial electrolifting and body remodelling treatments.

By emitting a very specific microcurrent to facial and body muscles, the Vitaderm® 4000 and VitaLift™ systems are able to stimulate muscles effectively, to restore the full vigour of youth to the face and body.

Features

Vitaderm® 4000 (face and body)

Offers 26 programs and 4 modes of treatment:

- 1 VitaLift™ (drainage, specific and automatic facial stimulation)
- 2 VitaLize™ (iontophoresis)
